I4.OS™ | SmartFactory™

for NetSuite

PCG

SUSTAINABILITY. NOW.

ASMARTFACTORY.COM

THE POWER TO BUILD.

The I4.OS | SmartFactory™ gives you the power to build more product, more quickly, more intelligently and more profitably across your manufacturing operation.

A SMARTFACTORY?

Technology has profoundly impacted how manufacturing and factories operate. Technology is making the process of manufacturing more intelligent and dynamic, leading to "smart factories."

A smart factory happens within the four walls of your plant or operation. A well executed smart factory harnesses the power of production, information, communication, equipment, people and automation to integrate everything across a manufacturing business.

INDUSTRY 4.0 FOR NETSUITE

The I4.OS | SmartFactory™ isn't a single technology or product. It is a portfolio of applications that extends native NetSuite functionality to provide robust manufacturing capabilities to drive better production, improved profitability and new competitive advantage.

Key Industry 4.0 components for a smart factory environment are:

- Machine Integration: and edge devices via Industrial Internet of Things (IIoT)
- Cloud: for scale, security and cost effectiveness
- NetSuite Integration: out-of-the-box connections to transactional data, workflows and processes
- SuiteAnalytics: for real-time production optimization, insight and profit opportunity
- "No-Code" Extensibility: Leverage the TULIP™ "no-code" platform to extend new functionality

See how The I4.OS | SmartFactory™ makes Industry 4.0 happen on NetSuite ERP and Advanced Manufacturing right **here**!

I4.OS | SMARTFACTORY BUNDLE

I4.OS | SmartFactory™ Bundle delivers the **power to build** by integrating key functionality into your NetSuite environment:

- Work Order Selection
- Materials Management
- Digital Work Instruction
- Bar Code Scanning and Label Printing
- Labor Reporting
- IIoT Connectivity, Machine Monitoring and Machine-to-Machine Interactions
- Compliance Management (GMP, HACCP, CFR, etc.)
- Analytics, Dashboards & Operating Reports
- Production Insights

I4.OS SmartFactory Add-ons bring the **power to grow** your manufacturing capability with Machine-to-Machine Integration, Operational History Records and Electronic Batch Record Management.

I4.OS™ | SmartFactory™

IIoT READY
Real-time Machine Monitoring for OEE, production, downtime, quality and performance analytics to drive continuous improvement.

SUITESUCCESS READY
Extends the power of SuiteSuccess, leveraging native functionality for a fast integration and go-live.

MANUFACTURING STAIRWAY
Supports NetSuite's Stairway - Assembly Builds, WIP, Routings, Work Orders and Advanced Manufacturing. Reduce reliance on 3rd party.

LEVERAGES NETSUITE
Builds upon Work Order, BOM, Inventory, Routings, Supply Plan and other native NetSuite functionality.

ORACLE NETSUITE

KEY DATA CONNECTIONS
Materials, downtime and loss, scrap, production, completions, labor, quality, work instructions, production notes, labels, IIoT tags.

READY TO GO BUNDLE
Snap-in new functionality and capability, right out of the box to grow value more quickly and cost effectively.
