DIGITAL MANUFACTURING SOLUTIONS

The I4.OS | SmartFactory™ gives you the power to build more product, more quickly, more intelligently and more profitably across your manufacturing operation.

THE SMARTFACTORY?

One doesn't need to look too closely to see that technology has profoundly impacted how businesses and factories operate. The application of technology is making the process of manufacturing increasingly intelligent and dynamic, leading to "smart factories."

The SmartFactory happens within the four walls of your plant or operations. The SmartFactory combines production, information, communication, equipment, humans and automation to integrate the entire manufacturing process.

AN INDUSTRY 5.0 SOLUTION

The SmartFactory isn't a single technology or product. It is a portfolio of applications that extends native NetSuite functionality to provide robust manufacturing capabilities to drive better production, improved profitability and new competitive advantage.

Key elements of Industry 5.0 and SmartFactory manufacturing are:

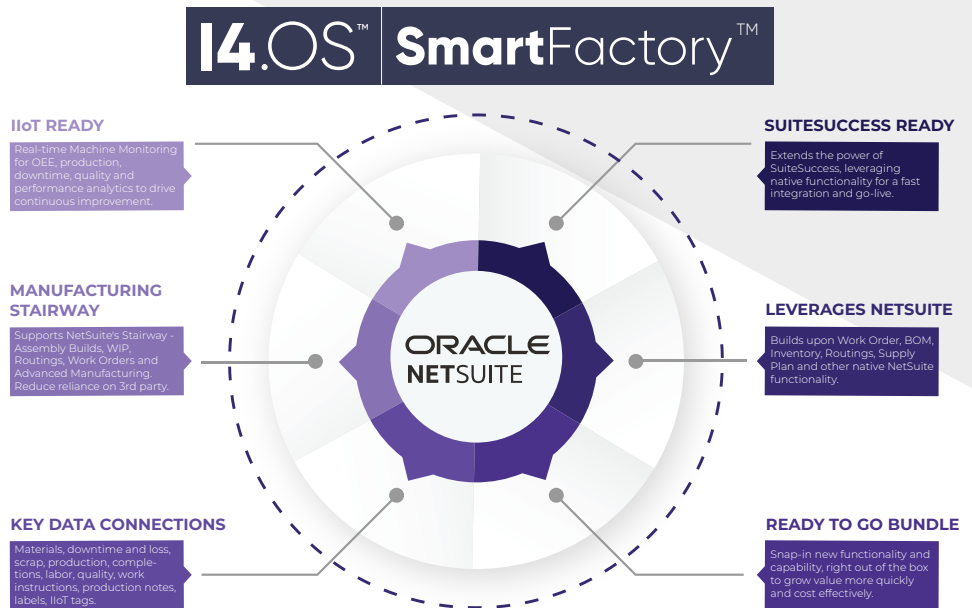

- **Machine Integration:** and edge devices via Industrial Internet of Things (IIoT)
- **Cloud:** for scale, security and cost effectiveness
- **NetSuite Integration:** out-of-the-box connections to transactional data, workflows and processes
- **SuiteAnalytics:** for real-time production optimization, insight and profit opportunity
- **"No-Code" Extensibility:** Leverage the TULIP™ "no-code" platform to extend new functionality
- **Human Centricity:** Enabling people to do more, more easily through information and tool access.

THE I4.OS SMARTFACTORY

PCG extends the value of NetSuite to bring Industry 5.0 and SmartFactory functionality and capability to your manufacturing operations through enhanced:

- Work Order Selection
- Materials Management
- Digital Work Instruction
- Bar Code Scanning and Label Printing
- Labor Reporting
- IIoT Connectivity, Machine Monitoring and Machine-to-Machine Interactions
- Compliance Management (GMP, HACCP, CFR, etc.)
- Analytics, Dashboards & Operating Reports
- Production Insights

The I4.OS SmartFactory quickly and cost effectively accelerates the integration of your NetSuite ERP platform to the shop floor and equipment. And, it is only available from PCG.
